

LAND SURVEYING NOT YOUR AVERAGE CAREER

THOSE ENTERING THE FIELD OF SURVEYING DON'T ASK IF THEY CAN FIND A JOB

Instead, they decide where would they like to work. That's because the demand for surveyors is high and continues to grow. High demand means job security and great benefits. Surveyors also collaborate with many other professionals including engineers, architects, attorneys, realtors, developers, contractors, and advise land owners.

Career Days and Job Fairs

Is your school holding a career day or job fair? If so, invite your local ISPLS Chapter to be a presenter. They will gladly speak about the profession and may also bring field equipment for their presentations. Contact ISPLS Communication Coordinator [Jordan Nussear](#) for more information.

Trig-Star

Trig-Star is an extracurricular competition held each year across Indiana. The timed exercise involves solving trigonometry problems using right triangle formulas and the laws of sines and cosines. It's a perfect opportunity to introduce students to the surveying profession. Visit trig-star.com or contact the ISPLS State Coordinator [Tony Gregory](#).

Additional Resources

For more information, please visit the following land survey/GIS/mapping education resources to realize the tremendous opportunities for students who choose a land surveying career path.
