Polyvagal Theory and Education

Lori Desautels

ABOUT THIS SESSION: Our nervous systems and physiological states create and produce the behaviors in school we observe, question, discuss, punish, suspend, seclude, and attend to in all moments throughout the day! As educators and counselors who sit with 30 to 180 plus nervous systems every day, we have traditionally paid attention to observable behaviors, assessing them as appropriate, disrespectful, inappropriate, oppositional, aggressive, manipulative, and a variety of other labels and classifications. Polyvagal Theory and the social and affective neuroscience research now share; that education requires “state regulation” so we are able to access and integrate the cognitive and mental tasks we need to succeed in school and positively navigate life experiences. Dr. Desautels will share the practices that address the nervous system states of our children and adolescents in the classroom preparing the brain and body to learn deeply, mitigating negative behaviors and meeting students in their brain and body state.

SPEAKER BIO: Dr. Lori Desautels, has been an Assistant Professor at Butler University since 2016 where she teaches both undergraduate and graduate programs in the College of Education. Lori was also an Assistant Professor at Marian University in Indianapolis for 8 years where she founded the Educational Neuroscience Symposium. Because of her work, Lori has been able to attract the foremost experts in the field of educational neuroscience, trauma and adversity growing the conference from 60 participants to over 500. Dr. Desautels’ passion is engaging her students through neuroscience as it applies to education by integrating Mind Brain Teaching, learning principles and strategies into her coursework at Butler. The Applied Educational Neuroscience Certificate, created by Lori in 2016, is specifically designed to meet the needs of educators, counselors, and administrators who work beside children and adolescents who have, and are, experiencing adversity and trauma. Lori’s articles are published in *Edutopia*, *Brain Bulletin*, and *Mind Body Spirit* international magazine. She was also published in the *Brain Research Journal* for her work in the fifth-grade classrooms during a faculty in residence position with Washington Township Schools. Lori is the author of 4 books. Her most recent book, *Connections Over Compliance: Rewiring Our Perceptions of Discipline* was released in late 2020. Lori has met with well over 70 school districts across the country, in Canada, Costa Rica and Dubai equating to more than 100,000 educators with much more work to be done!

Lori will also be presenting a breakout session.

Friday, November 18 • 8:30 am – 12:00 pm

The Core Skills Building Workshops are included in the conference registration fee and are being held at the same time. Each session will be repeated twice, once from 8:30 a.m. – 10:00 a.m., and again from 10:30am – 12:00 p.m.
