

UFP BUSINESS SCHOOL

What is it?

- The UFP Business School was established in 2016. It's an innovative approach to traditional higher education, which usually requires a four-year commitment and a substantial cost. Our program is underwritten 100% by a full UFP Industries scholarship that provides students with competitive college-level business education and future career opportunities. We are not accredited due to being owned and operated by UFP Industries. We don't have to rely on federal or state funds to operate our school. Our instructors are UFP employees who are giving you the knowledge along with the real-world application. Our instructors deliver their knowledge and expertise in the classes they teach, and our students thrive in an environment where what they are learning today can be applied tomorrow.
- Our program combines classroom courses in business areas such as marketing, finance, and entrepreneurship with a paid internship at UFP Industries, a fast-growing, \$8 billion Fortune 500 international company. (www.ufpi.com).

Why do you want to attend UFP Business School?

- At UFP Business School, our purpose is to provide a unique scholarship program that combines quality education and paid hands-on experience opportunities.
- You invest two years, 30 business courses, instead of the traditional four years it takes to earn a bachelor's degree. At the same time, you get the opportunity to sample various parts of the business (sales, production) so you can develop a career path that suits you. Our degree is equivalent to a Bachelor of Business Administration.
- You will graduate with the knowledge, skills, and experience you need to step into careers that offer great opportunities for advancement. UFP is a company that promotes from within.
- You get to work for UFP Industries with over 200 affiliated operations, which supply thousands of products to three markets: retail, construction, and industrial. Our businesses are operated and managed by over 15,000 experienced and dedicated people around the globe.

How do I apply?

- You submit an online application, transcript/GED, and letter of recommendation. Admission is based on an individualized selection process.

Class size?

- The number of students admitted is kept small, so you will never have more than 25 students in a class.

Where is the campus?

- Classes are administered in person at UFPI's corporate offices in Grand Rapids and live, virtually via Teams for students in the field. Internships/part and full-time positions are at the Grand Rapids office and around the country at any of our plant locations in the US.
