OUR SERVICES

Wake County Behavioral Health Urgent Care

Monarch's Behavioral Health Urgent Care (BHUC) is a walk-in service for individuals ages 4 and older with mental health and substance use disorders who are experiencing a behavioral health crisis.

The BHUC treatment model is designed to provide assessment, stabilization and psychiatric intervention for individuals ages 4 and older who are experiencing a behavioral health crisis by a multidisciplinary team that includes licensed therapists and experienced medical professionals. This program is designed to ensure people are linked to the least restrictive and most appropriate level of care that promotes their continued recovery. The BHUC also serves as a means of diversion from the use of emergency departments or hospitals and can initiate the involuntary commitment (IVC) petition via first-level evaluations (clinician petition) for people who require IVC.

At Monarch, our Behavioral Health Urgent Care programs provide a safe, secure and healthy environment where healing and recovery can begin.
