North & South Carolina

As a Clinical Outreach Specialist serving North and South Carolina, my role is to help you serve your clients and families by connecting you with resources and treatment options. Contact me to discuss the various levels of mental health care available, including acute stabilization, residential treatment, a Partial Hospitalization Program (PHP), an Intensive Outpatient Program (IOP), and outpatient services. For teens and young adults with a primary mental health diagnosis, substance use disorder (alcohol, opioid, or prescription drugs), and/or co-occurring issues such as self-harm and disordered eating, Newport Healthcare offers outpatient programming accessible to major cities, as well as residential treatment locations around the country for clients in need of a higher level of care.
