

Bloomsights

**Identify.
Investigate.
Intervene.**

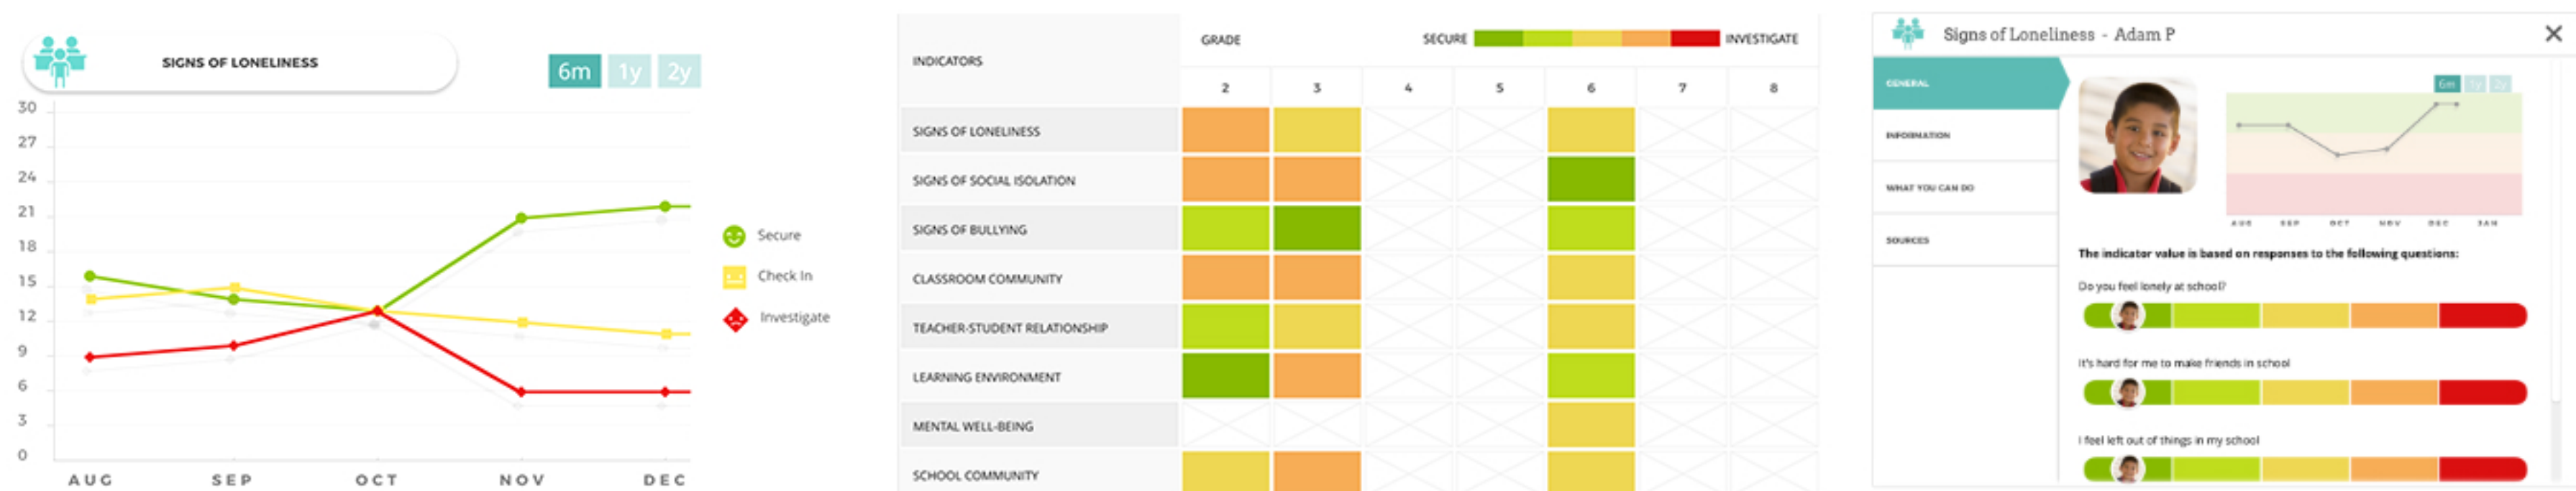

**A Formative Assessment Tool
For School Climate and
Student Well-Being**

From 30,000 ft. To Ground Level

From indicators and trends across the district to the individual student, know how your students are doing socially and emotionally.

Continuous

Adaptive survey technology makes monitoring school climate over the course of the school year easy

Immediate

Automatic real time response analysis means more time helping students

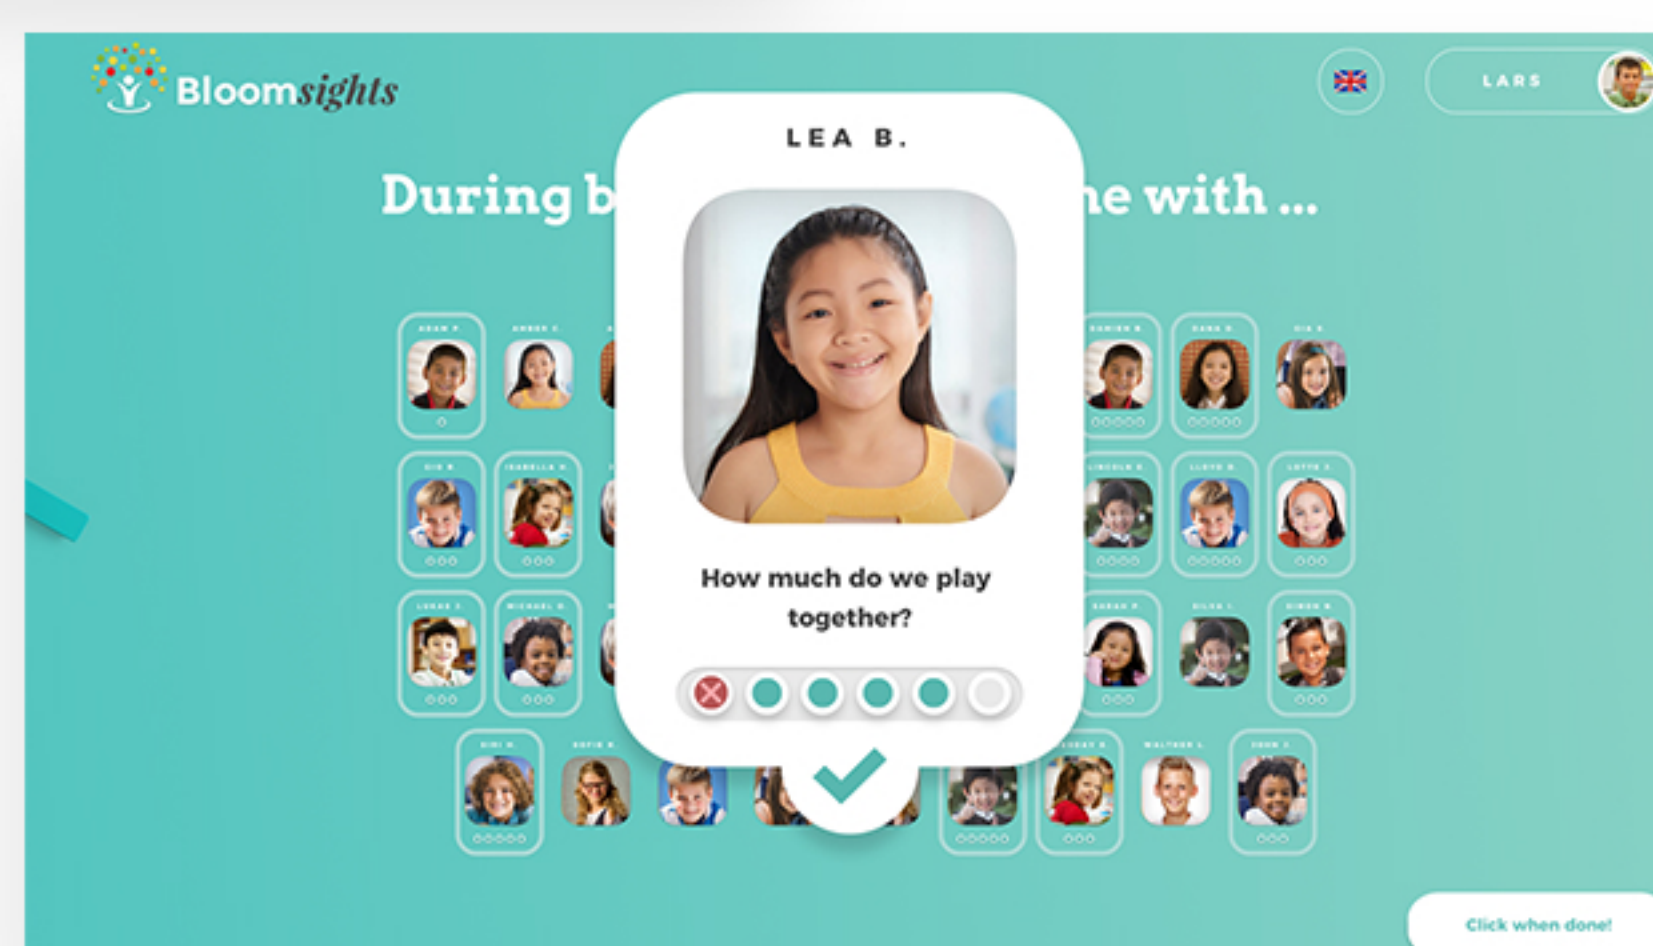

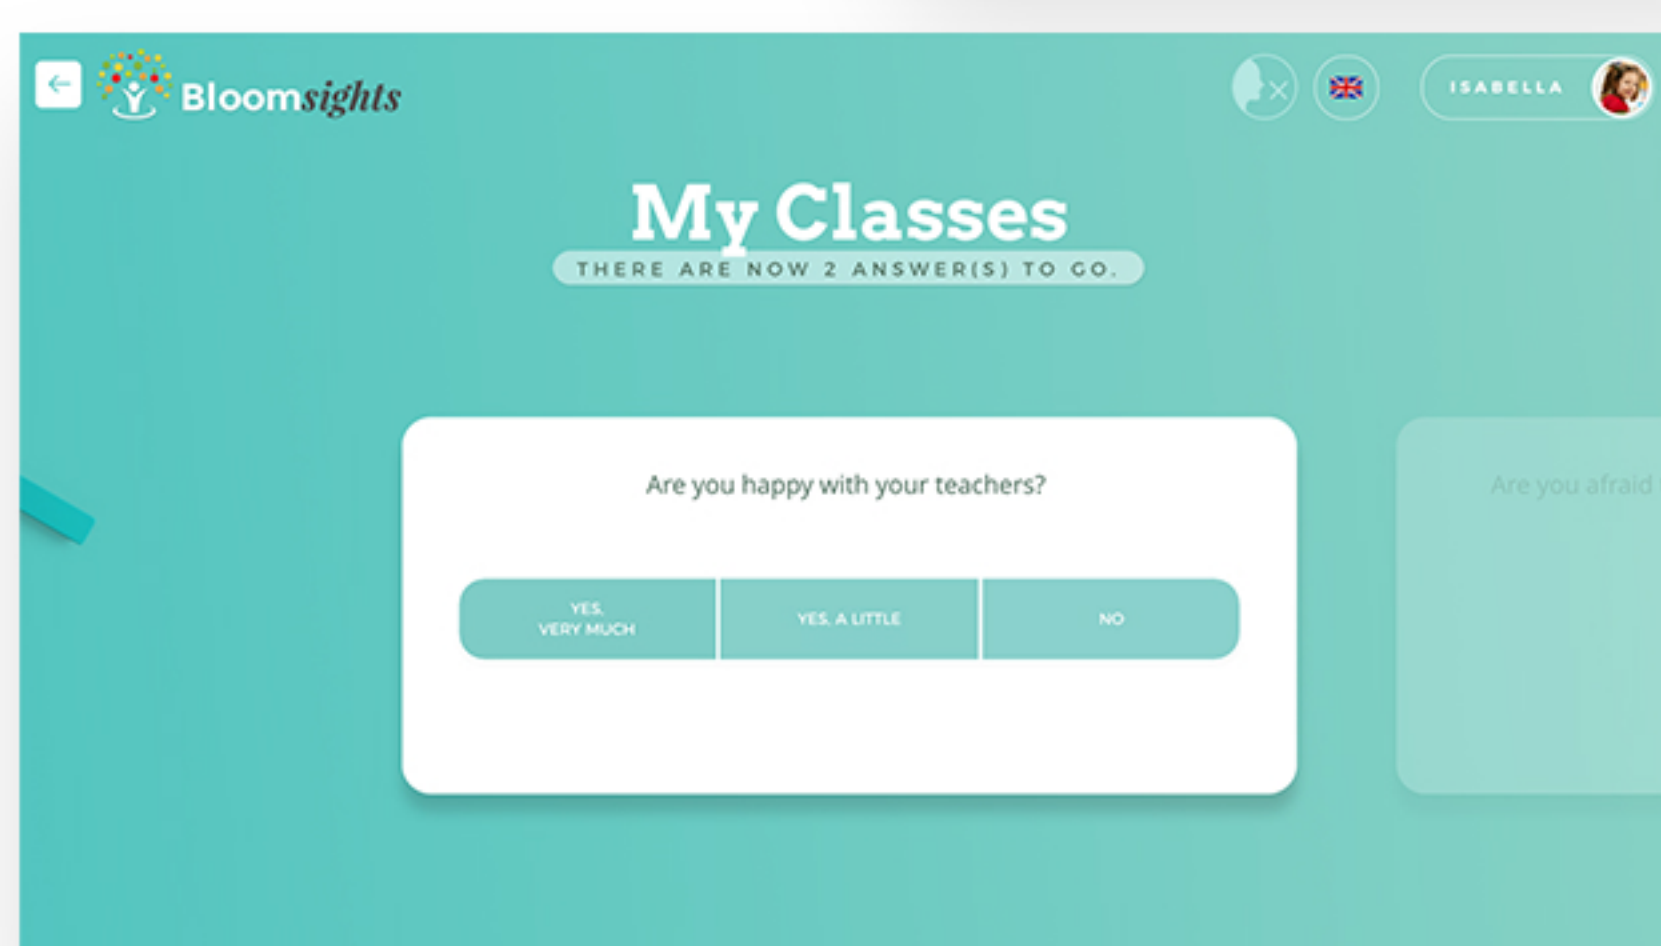

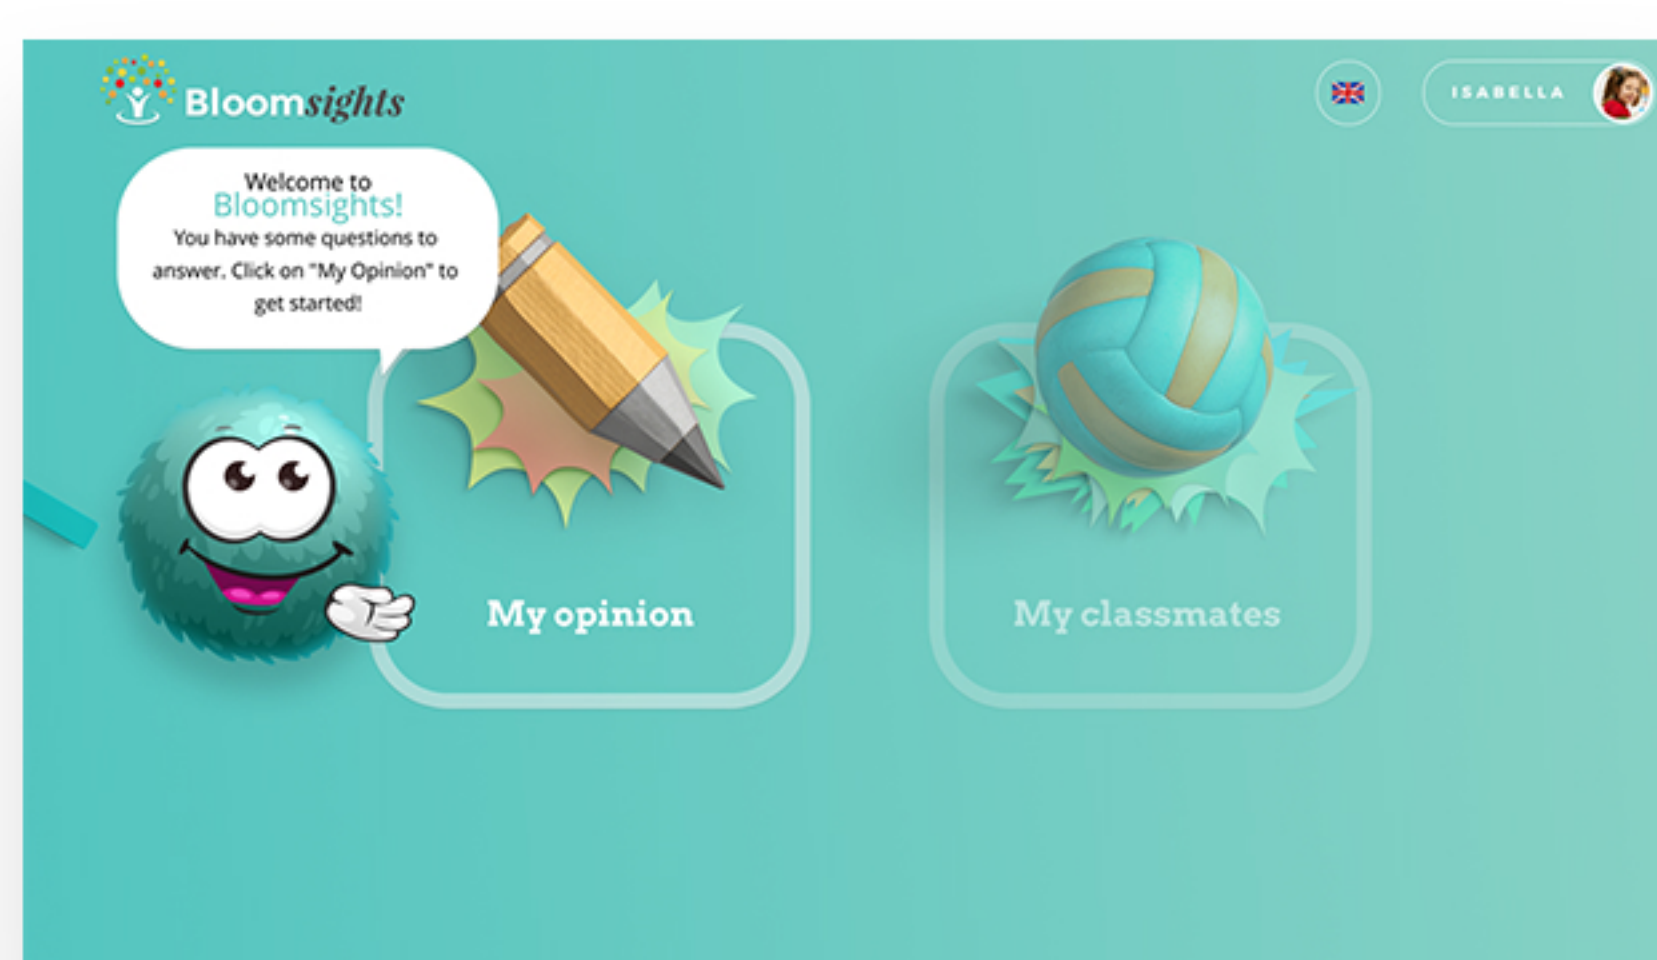

Personalized

Detailed data needed to address class and student needs

Students Feel Valued When Their Opinions Matter

Bloomsights makes it safe and easy for your students to share how they feel about their experiences of school life.

Powerful and effective force for school improvement

Transforms classrooms into personalized learning environments

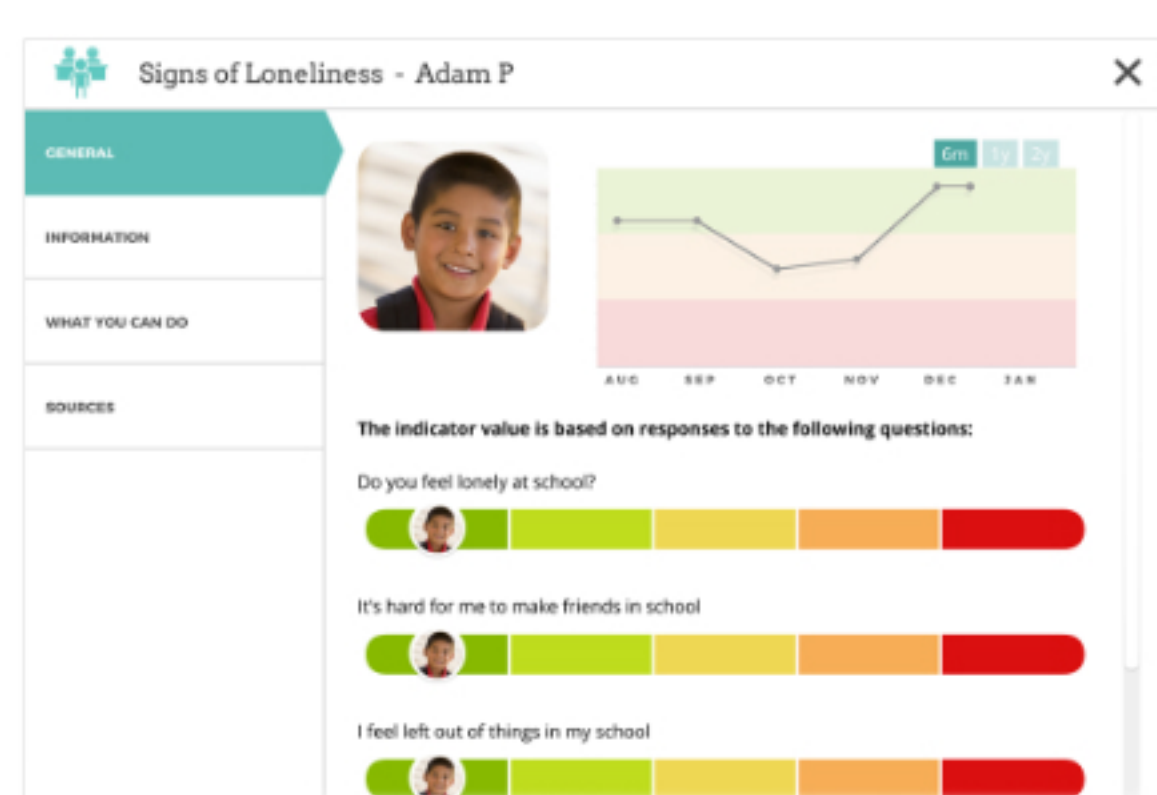

Helps students feel more connected and cared for

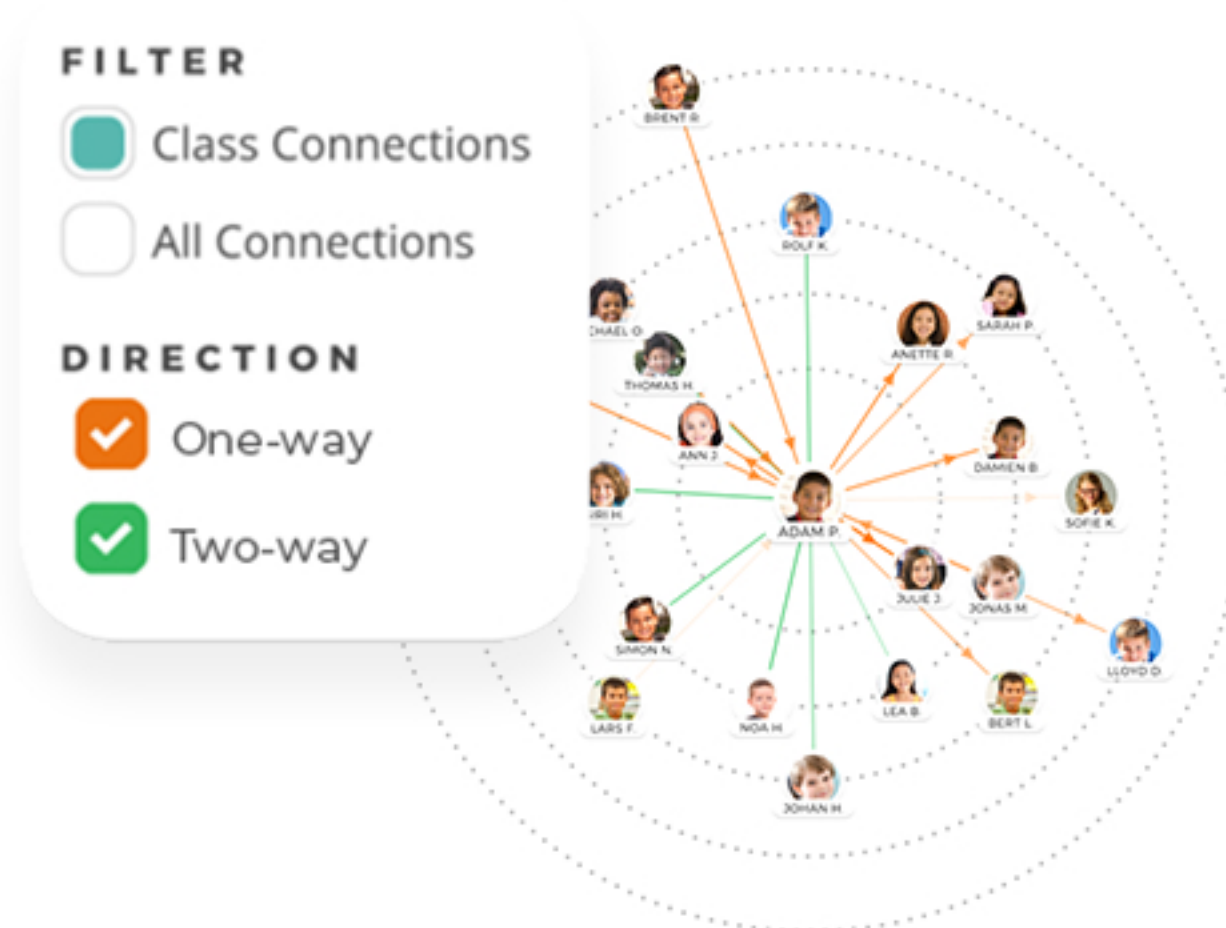

Teachers Need Tools Not Tasks

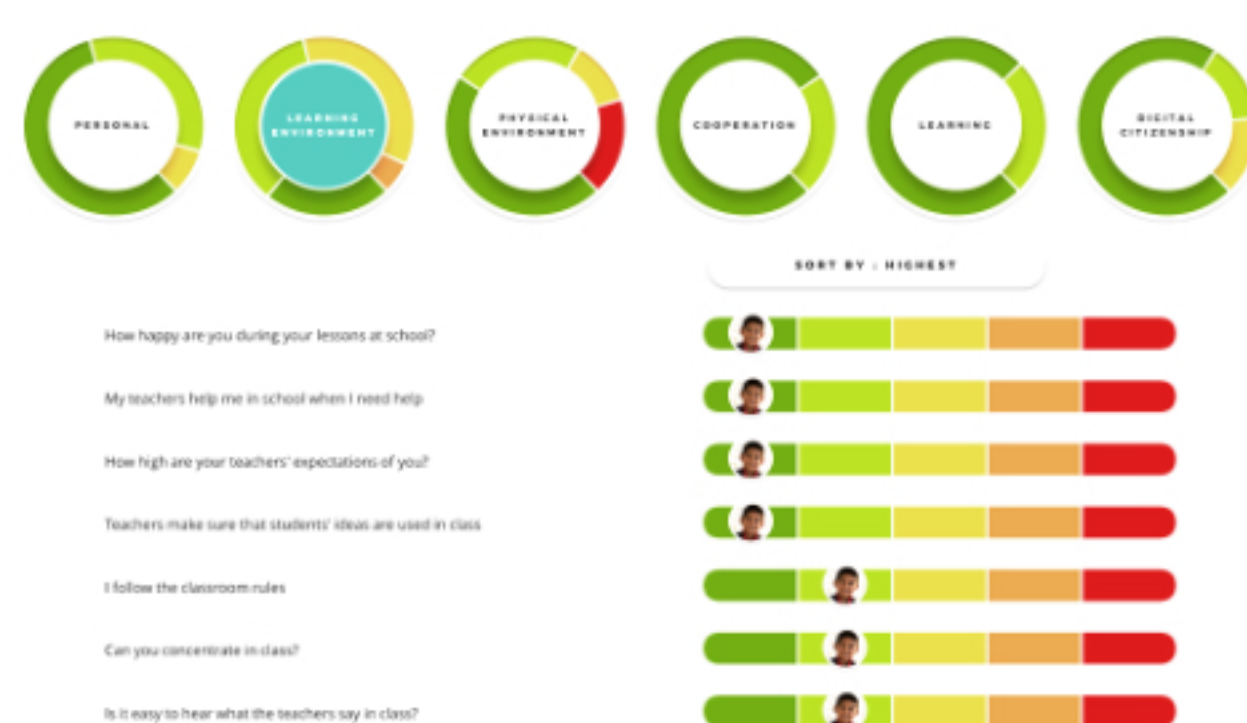

Bloomsights provides you with a continuous stream of the data you need to answer the questions “So what?” and “Now what?”

Over 15 research-based indicators

Underlying social dynamics at the class and grade level

Insights into multiple dimensions of a positive school climate

Tailored to
your needs

Guidance
not just
numbers

Build
relationships
between staff
and students

Testimonials

"Bloomsights is an empowering program for K-8 students. The insights delivered by Bloomsights allow staff members to get to the root of issues that students are struggling with such as bullying, loneliness, feeling outcast, disengagement, and a lack of healthy social connections. "

Kristi Gregersen, School Psychologist

"Our school district does a yearly connections survey to check in on some SEL measures for students. I really wanted more information and I wanted it to be longitudinal, not just how they felt on that one day a year. Bloomsights allows me to take measurements on how my students feel every month and see that data over time. We've used its many dashboard metrics to intervene with students who aren't connected, address bullying, and improve teacher-student relationships. It has been a great tool to use."

Brett Larsen, Middle School Principal

"Students loved going in and being able to have a voice about their school culture and about their own feelings. Teachers liked that it validated a lot of their observations in their classroom and provided them with a tool and visuals to support them. As a counselor, I was able to find students that fly under the radar because of their internalizing behavior. It has been a great tool to allow me to find students for groups, restorative circles, and some that just needed a quick check-in."

Kelly Carroll, Elementary School Counselor

At Bloomsights, we are experts at creating adaptive, responsive, and flexible school climate surveys. Reach out to Bloomsights for an in-depth discussion on how to implement a quality social and emotional assessment plan.
