

Meet Amanda

Amanda's childhood passion for math and science led her to study both mechanical and biomedical engineering at Old Dominion University. She landed an internship with LifeNet Health, a biotechnology company that specializes in organ procurement, tissue grafts, and other regenerative medicines, thanks to résumé and application help she received from ODU's Career Development Services Center. As an intern, Amanda now works on LifeNet Health's production and logistics team, testing new equipment and procedures, improving processes and ensuring the quality of grafts. This hands-on experience has confirmed her desire to pursue a career in biomedical engineering.
