Located on the campus of Ball State University, **the Indiana Academy for Science, Mathematics, and Humanities** is one of the best resources for high ability and gifted education in the state. The Indiana Academy offers youth enrichment programs, distance learning opportunities, professional development, and a high school (10th-12th grade) specifically designed for high ability learners, high achievers, and creative thinkers.

Indiana's #1 Public High School

Consistently ranked among the best public high schools in the country, the Indiana Academy is the #1 public high school, #1 college prep public high school, and #1 school for STEM in Indiana.* Our residential students live in a secure residence hall exclusively for Academy students, while our non-residential students commute to campus. In addition to our Indiana students, we also host high-achieving international students, coming from all over the world. All Academy students have access to the resources Ball State has to offer, while learning from the Academy's nationally-ranked* faculty.

Gifted & Talented / High Ability Resources

The Indiana Academy is a respected resource for parents and educators seeking more information about gifted, talented, and high ability education in Indiana. While we provide a physical, intellectual, and social environment in which students with exceptional academic ability can thrive in an appropriately exceptional learning community, we recognize that the Indiana Academy isn't the perfect fit for every high school student. Through our numerous programs, workshops, and sessions, we also serve Indiana as a state-wide center for gifted education so that teachers and parents across the state can have access to the programs and resources appropriate to the abilities of these academically gifted pupils.

Online/Distance Courses

Providing online educational options for students since 1990, we serve students in Indiana, nationwide, and around the globe seeking advanced high school courses. As an accredited public high school specializing in students with high academic potential, our highly qualified and nationally ranked faculty also teach our online dual credit and AP courses. These courses are designed for online/distance students to work at their own pace while still remaining at their current school.

Professional Development

Part of the Indiana Academy's mission is to serve as a resource for educators and school personnel who serve gifted and talented or high-ability students. We offer the Advanced Placement Summer Institute (APSI), where teachers spend four intensive days learning strategies and best practices for teaching AP courses led by College Board certified instructors that are experts in their subject areas. Our School Counselor Workshop is an annual day-long event full of information and resources for counselors.

Youth Enrichment Programs

The Indiana Academy provides a wide-range of youth programs including summer camps with a focus on gifted and high-achieving students. Taking place in schools around the state, on our campus, and online, these programs provide engaging topics, unique experiences, and qualified instructors that spark creative thinking and a love of learning in developing minds.
