

Frequently Asked Questions

How do I get my child admitted?

Please call the Pine Rest Contact Center at 800.678.5500. An assessment will be completed to determine the appropriate level of care. A provider referral is not needed, although it can be helpful to coordinate services.

Do you take insurance?

Pine Rest participates with almost all major insurance plans. Co-pays and deductibles vary. Contact your insurance provider for what your plan will cover. Patients with Medicaid or no insurance must contact their local Community Mental Health for assessment and referral. Our intake clinicians can assist you in the process.

Is lodging available for patients and their families?

Families from long distances may arrange lodging at one of the area hotels or Ronald McDonald House. Intake clinicians can provide local lodging information.

Are meals available for patients?

You may pack a lunch and/or snack for your child or lunch will be provided.

What is the average length of stay?

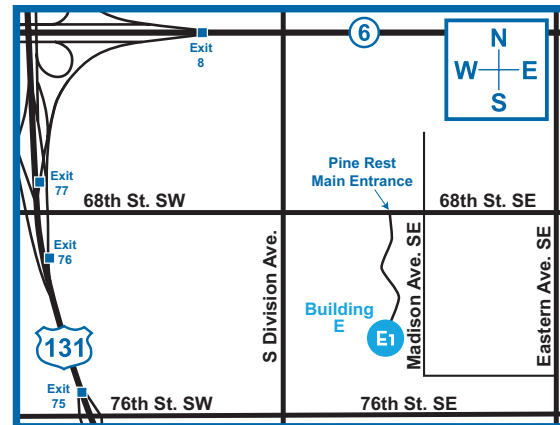

Length of treatment will be based on the patient's individual needs and will be re-evaluated through their stay. Average length of stay is 6-10 days.

Adolescent Partial Hospitalization (Day) Program

Adolescent Partial Hospitalization (Day) Program

The Adolescent Partial Hospitalization Program is a short-term, intensive treatment program offered to adolescents experiencing significant mental and/or emotional problems. Our goal is to assist individuals and their families in managing these problems.

This day treatment program is specifically designed for adolescents (ages 13 to 17) who meet the criteria for admission and cannot be adequately treated through traditional outpatient services.

Admission criteria includes significant disturbances in conduct, impairment in ability to function within the family and/or in school. The individual must be able to tolerate an eight-hour day that includes participation in groups and a classroom setting.

Services

The partial program operates 8 a.m. to 2:30 p.m. The first day of treatment starts earlier. Family sessions are available based on need. The intake clinician will advise what time you should arrive on your child's first day.

Our program is focused on crisis stabilization through group therapy and psychoeducation groups, which are led by members of a multidisciplinary treatment team. In addition, patients will meet with members of the treatment team throughout their stay to work on coordination with schools, creating a plan for aftercare as well as medication management as needed.

Group Topics Include

- Communication Skills
- Community Involvement
- Coping Skills
- Creative Expression
