

Pathfinders

Guiding K-5 Students Towards Thriving Futures

What We Offer

A student-centered online app lets K-5 students play interactive games to learn how careers and postsecondary pathways will help them reach exciting futures.

Aligned to Standards

Pathfinders is mapped to ASCA, CASEL, & ISCA standards. Topics include: Tools of the Trade, Skills and Interests, Financial Literacy, and Post-Secondary Basics

Different Pathways

Introduce students to college, trade/apprenticeship, and military pathways, with career options in each. This allows them to learn about a variety of choices they will have.

Designed by Award Winning Counselors

Award-winning counselors, speakers, and published authors on elementary career exploration designed our lessons and games. You gain their expertise, innovation, and strategies for success.

Career and Postsecondary

Bring college and career readiness to your K-5 students. By expanding their horizons and knowledge early, you will spark their curiosity and ambition.

Ready-to-Use Lessons

Supplemental lessons designated for specific grade bands are provided. These lessons can be used sequentially or independently in any order.

Real-World Learning

Equip students with skills and knowledge for the real world. Promote design thinking, emotional growth, and problem-solving. Connect SEL to the world of work.

Empowered Students

Our iOS or Android mobile app games provide a fun way for students to learn about the world of work and the different options they have. They can begin to plan for bright and exciting futures.

Reporting and Accessing Student Work

Report on game completion, students' career interests, and standards. Students' work is saved to follow them throughout their school careers in the MaiaLearning platform.

Everything in One Platform

Whether students prefer self-guided exploration through games, or classroom instruction led by teachers, Pathfinders meets their needs and yours. You get the interactive game implementation guides, slide decks, educator plans, and worksheets. You'll be ready to offer a versatile and engaging range of options that cater to a variety of learning styles.

Aligned to Respected Standards

Pathfinder's games and lessons align with a variety of ASCA, CASEL, and ISCA standards. Each guide lists which standards a game or lesson covers, making it easy to choose the standards you would like to address.

Piloted by Students and Counselors

We designed Pathfinders' engaging interface with student input and feedback from U.S. counselors piloting the product. You'll find your students asking to come back to the app to design their avatars, unlock new accessories, and earn stars while learning as they play the games.
