

LEARNING BEYOND THE CLASSROOM

Why choose an APPRENTICESHIP?

We are the Central Midwest Regional Council of Carpenters – over 37,000 men and women proudly building America. Members are highly-skilled professionals in crafts including carpentry, millwrighting, and floor covering.

We take an “earn-as-you-learn” approach to our apprenticeship, ensuring anyone can earn a good, living wage with benefits for their family – right from the start.

GUARANTEE OF QUALITY

Our four-year apprenticeship program provides in-class, in-shop, and paid on-the-job training. Apprentices learn meaningful skills hands-on while applying them on the job with real-world experiences.

- Apprentices earn 60 college credits and an Associates Degree at no additional cost or time.
- After completing the program, participants are offered free continuing education classes over the course of their career.

BUILDING A MORE SECURE FUTURE

What does the **FUTURE HOLD?**

An apprenticeship is just the start of a secure future. Upon graduation, apprentices become a Journey person.

Future advancements could include becoming a Foreman, Superintendent, Management, Owner, Training Instructor or CMRCC Business Representative and more.

BENEFITS

- ✓ Apprentices receive top-notch benefits including healthcare, vision, and dental insurance.
- ✓ Apprentices also begin to earn money into their pension and annuity, setting them up for a solid financial future.
- ✓ All benefits are paid by the apprentice's contractor. These contributions are not taken out of their paychecks.

CARPENTER

Carpenters are responsible for bringing an architect's blueprints to life by working with wood, fiberglass, metal, vinyl, plastic, and other materials to create the interior and exterior of structures.

Carpenters build and renovate:

- | | |
|-----------|-------------|
| Homes | Airports |
| Schools | Skyscrapers |
| Churches | Highways |
| Hospitals | Bridges |

FLOOR COVERER

Floor Coverers install all types of flooring materials including carpet, laminates and vinyl, wood, and sports surfaces. Work is often done based on specifications of architects and interior designers.

Floor Coverers work in:

- | | |
|-----------|----------------|
| Banks | Shopping Malls |
| Schools | Theaters |
| Hospitals | Libraries |
| Hotels | Museums |

MILLWRIGHT

Millwrights are an elite group of construction workers who work primarily in metal and with machinery and equipment requiring precision.

Every Industry requires millwrights:

- | | |
|------------|-----------------|
| Energy | Pharmaceutical |
| Refinery | Transportation |
| Nuclear | Food Processing |
| Automotive | Manufacturing |
